

Kingshow Lighting Warranty

Kingshow Lighting warrants that the products provided by Kingshow Lighting to you hereunder will be free from defects in workmanship and materials and conform to the specifications under normal use and service. After the products have been delivered to your warehouse or any other designated places by Kingshow Lighting, if it appears that any products, or part of, contains a defect in materials or workmanship, or otherwise fails to conform to the specifications, Kingshow Lighting shall at its expense, provide in factory repair on any defective product or part, or at Kingshow's option, by delivering an equivalent products or part to you to replace such defective products or part.

Kingshow takes quality seriously and strictly inspects incoming material, in-process, semi-finished products and complete products and make sure each product is qualified before shipment. You also can ask the third party to inspect your goods before shipment.

About the color fading away concern, Kingshow declares that unlike the finish by powder coat, the finish of Kingshow's products is made by chemical treatment that is not easy to fade away under the sunshine. Due to the solid brass, the products made from Kingshow are anti-corrosion and naturally weather over time to a beautiful patina if working in the wet and salty environment. The time of patina coming out depends on the environment where the products are mounted. Moisture is the catalyst that greatly speeds up the chemical reactions.
